Bogomip

Release 0.0.0

Shane R. Spencer

October 28, 2013

CONTENTS

I'm not sure if you're familiar with BogoMIPS but it's been around for a while in the Linux community. It's always been easy for me to see acronyms like **BogoMIPS** as plural, especially when it is a measured unit of something. It makes perfect sense that a BogoMIP is a single unit of a BogoMIPS measurement.

So.. I've held on to this domain for quite some time. I love phrases, expressions, and strange ways to say things. Bogomip.com is just one of those things and it is my attempt to tie myself to the Linux and Free and Open Source through obscure references.

My name is Shane.. and this is my space for stuff on the Internet.

Blog migration to readthedocs.org

This is just a post saying I'm going to be moving my old blog over here one article at a time. This gives me the amazing opportunity to use good markup.. good extensions.. and really have control of the content on my blog.

If you aren't already aware of readthedocs.org please check it out. I'm using it for several projects right now:

- MongoLikeCandy

- GloboFS

- AllYourDatabase

The guys on #readthedocs on IRC (freenode) are pretty helpful as well :)

I have to get a few things working out with the theme so that I can add in the RSS XML

There's a few gotchas with how the table of contents works as well and I need to figure out how to set a **parent** page to some degree. We'll see how well that works out.
